Emilien CHASTE

Adjunct Lecturer

Présentation

As a former consultant and now in charge of controlling for a large digital services company, I share my experience in ERP deployments. Through a concrete project in agile mode, students become familiar with the FI and CO modules of SAP® and discover the design of P&L in IFRS standard, process modeling, parameter setting and use of the FI and CO modules of SAP®. The objective for the students is to understand their role in the company (ERP Key user, Project Management Assistant, ERP Consultant).

> Laboratoire de recherche :

Thèmes de recherche

Integrated management software packages – SAP ERP.

Business process modeling and execution in FI/CO

Agile methods applied to ERP systems

Activités pédagogiques

- Understand the roles that could be held by the students at the end of the training (ERP Key user, Project Owner Assistant, ERP Consultant)
- Introduce students to SAP ERP 6 (Think / Build / Run)
- Learning via a practical project in a time constrained environment.
