

Karine LE RUDULIER

Associate Professor

Présentation

My research focuses on entrepreneurship along three axes:

- The pedagogy of entrepreneurship, particularly the impact of new tools or teaching modalities (learning by doing) on teaching.
- The evolution of students' entrepreneurial intentions in training programs.
- The evolution of networks connected to business takeovers.

At the same time, my experience as a manager of associations has led me to reflect on the impact of an associative program on our students.
