Thi Le Hoa VO

Full Professor

Présentation

President of IGR-IAE Rennes's scientific council

My research work focuses on the field of steering and decision support for production systems and supply chains. I am particularly interested in researching and studying methods and tools in order to find adequate solutions to solve steering and performance improvement problems of the global and collaborative chain.

Recherche et entreprise

Scientific outreach

Scientific Projects

- RSC Management (Risk, Credit Chain & Supply Chain Management) Project (FUI 15, 2013-2017)
- Project FILEAS FOG-ANR (ANR-17-CE10-0001-01, in progress)

Scientific events

- Permanent member of the scientific committee of the International Conference on Logistics Operations Management – GOL since 2012
- Permanent member of the Scientific Committee of ICALT – IEEE International Conference on Advanced Learning Technologies since 2013
- Permanent member of the scientific committee of the Seminar on Urban Logistics, CLUN, University of Nantes since 2012.

Evaluation of articles for journals or conferences

Risk Analysis: An International Journal; Logistics & Management; International Journal of Logistics Systems and Management; International Journal of Logistics Management; International Journal of Production Economics.

Thèmes de recherche

Supply Chain finance

Mutualisation des informations logistiques de distribution

Comportements de consommation et structuration logistique des filières alimentaires

Simulation des comportements des systèmes de production

E-Supply chain et productivité

Optimisation des processus et réseaux logistiques

RSE et chaîne logistique collaborative.

Keywords : Logistics, Information System, Distribution, Consumer Behavior, Supply Chain Management, Supply Chain Finance, CSR, Systems Dynamics, Optimization, Simulation

Training through Research

Participation in the direction of research

PhD of Dinh Anh PHAN (ongoing doctoral thesis, 2016-2019): Three essays in Supply Chain Finance

PhD of Ngoc Minh HOA (ongoing doctoral thesis, 2016-2019): The collaborative supply chain: the case of the Vietnamese textile industry.

PhD of Thi Lan Anh NGUEN (ongoing doctoral thesis, 2015-2018): Sustainable development and collaborative supply chains: towards a global performance of the supply chain.

PhD of Thi Huong DOAN (ongoing doctoral thesis, 2013-2016): The competition of foreign brands and Supply Chain Management : The case of the Vietnamese food industry.

Activités pédagogiques

Teaching

- Logistics
- Purchasing management
- Logistics and distribution
- Quantitative methods
- Supply Chain Finance
- Industrial and logistics management
- Production management and logistics
- Advanced Production Management
