

IGR-IAE Rennes – Summer School

Graduate School of Management

10-day course – July 1-10, 2026

Challenges for Sustainable Management

Our Summer School, dedicated to **Challenges for Sustainable Management**, offers a unique opportunity to deepen your understanding of the latest innovative solutions across different areas of management such as finance, human resources, supply chain, and more.

Managers are facing major challenges in an ever-changing world. During 36 hours of lectures, group work and field trips, you will learn how academics and practitioners have pioneered innovative solutions to transform these challenges into opportunities in this transition period.

This Summer School will also be the perfect opportunity to discover the charming city of Rennes, the capital of Brittany (north-west of France). The adventure includes a tour to the must-see Mont-Saint-Michel Bay, listed as a UNESCO World Heritage site, and referred as the “Wonder of the West”.

Embark on a transformative journey with an international cohort for 10 inspirational days, guided by our lecturers. Gain invaluable insights as you align theories and practices connecting with the latest initiatives and innovations. This experience will heighten your awareness, preparing you to anticipate the necessary transitions to address sustainable challenges in your field of expertise.
